University of Engineering & Technology Peshawar

Programming Fundamentals (C++) Lab

LAB REPORT 4

STUDENT NAME	MUHAMMAD YASEEN
ETEA ID:	BF25NWELE0670
COUSRE:	EE-170LCOMPUTER PROGRAMMING LAB
DATE:	3/2/26
LAB TITLE:	Installation Of C++

BF25NWELE0670

SUBMITTED TO ENGR RIZWAN ULLAH

Learning Objectives:

The objective of this lab is to install a C++ compiler and development environment on the computer so that we can write, compile, and run C++ programs.

Introducation:

C++ is a programming language used to develop software, applications, and systems.

To write and run C++ programs on a computer, we need a compiler and an IDE (Integrated Development Environment).

A compiler converts the C++ code written by the programmer into machine language that the computer can understand.

Common C++ compilers include:

1. GCC (GNU Compiler)
2. MinGW
3. Microsoft Visual C++
4. Dev-C++

In this lab, we installed Dev-C++ which is a simple IDE for beginners.

Software Requirement:

The following software was required:

a) Dev-C++ IDE

b) Windows Operating System

c) Internet connection (to download the software)

Installation Step:

Open the web browser and search for Dev-C++ download.

Step 2:

Download the Dev-C++ installer from a trusted website.

Step 3:

Open the downloaded setup file.

Step 4:

Click Next to start the installation process.

BE23NWELE0670

Step 5:

Accept the license agreement.

Step 6:

Choose the installation folder and click Install.

Step 7:

Wait for the installation to complete.

Step 8:

Click Finish to close the setup.

Testing & Installation:

After installation, we tested the compiler by writing a simple C++ program.

Example Code:

```
#include <iostream>

using namespace std;

int main()

{

    cout << "Hello World";

    return 0;

}
```

Output:

```
Hello World
```

This output confirms that the C++ compiler is installed correctly.

Conclusion:

BE25NWELE0670

In this lab, we successfully installed the C++ compiler using Dev-C++. We also tested the installation by running a simple C++ program. Now the system is ready for writing and executing C++ programs in future labs.
